***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1,2 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Cuschieri, et al.-5480410.

Cuschieri discloses an access device having an envelope with proximal and distal openings, the distal openings can be closed by a myriad of valves including pinholes (slit) which self-seal.

Claims 1,3,5,9 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Golub, et al.-5514133.

Golub discloses an access port having two collars connected by a pleated envelope. The distal part of the envelope can be sealed. A rim on the proximal collar sandwiches the tissue between the two collars.

Claims 1,13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Charowsky, et al.-4998538.

Art Unit: 3761

Charowsky discloses an access port having a proximal end sealable to tissue and a distal end having a band 32 which can close upon a laser inserted therethrough.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 5,653,705. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the application are merely broader in scope than many of the patent's dependent claims.
